

SP101 Mixed PDF Demo Page

Digital text: Fourier Transform converts a time-domain signal into a frequency-domain representation.

Digital text: Convolution combines two signals to produce a third signal.

Embedded OCR Region

Angular Frequency is measured in radians per second.

角频率表示单位时间内相位变化的弧度数。

Embedded Formula Region

$$X(f) = \int x(t) e^{-j2\pi f t} dt$$

$$y(t) = \int x(\tau) h(t - \tau) d\tau$$
